

# TEST AND POST

Home testing for sexually transmitted infections (STIs) -

CHLAMYDIA, GONORRHOEA, HIV,  
SYPHILIS, HEPATITIS B & HEPATITIS C

- This service is available to anyone over the age of 16 years.
- It is free.
- It arrives in discrete packaging within 7 working days.
- A freepost envelope is provided to return the samples to the laboratory.
- Public Health Wales will text negative results.
- If any results are positive, the sexual health service in the local area will contact them.
- There are safeguarding questions for 16 and 17 year old.
- There are links to support for those who identify themselves as victims of domestic violence, sexual violence and substance misuse.
- Condoms can also be requested
- Direct patients to [www.friskywales.org](http://www.friskywales.org)

- All walk-in services are currently suspended.
- Appointment line number: 03000 856000 Mon-Fri 9am-3pm
- Patients have a same/next day telephone consultation.

If you need immediate advice or guidance about:

- sexual health
- contraception or
- HIV

Please contact us using consultant connect.

We understand that there are conditions that overlap with other specialties such as gynaecology /dermatology/urology and would be happy to discuss these patients with you however we do NOT provide a genital dermatology clinic, PsychoSexual, erectile dysfunction nor menopause service.

Due to reduced capacity:

- We are not offering **routine** cervical smears
- Wart treatment is currently only available to those who are pregnant or immunosuppressed or under 18 years old or have meatal warts. Those not meeting these categories are placed on a waiting list. Please refer patients who you have diagnosed with warts rather than directing them to the appointment line number. Warticon is now available.
- If you diagnose herpes during an examination and have the ability to do a PCR test, please do, this will save the patient needing to be re-examined. We are happy to talk to the patient about the herpes diagnosis pre or post result.
